Professional Summary

Full Stack Developer with 5+ years of experience taking web and SaaS products from concept to production. Experienced in owning product development end-to-end, including planning, solution and system design, full-stack implementation, deployment, and production operations. Built multi-tenant platforms, internal business systems, and AI-assisted workflows using TypeScript, Next.js, Node.js, React Native, and cloud infrastructure.

Work Experience

Storytelling Marketing Agency

Full Stack Developer (Contract), Feb 2026 – July 2026, KSA (Remote)

- Took end-to-end ownership of ExplodX360, a **multi-tenant field marketing platform**, from product planning and solution design through development, deployment, and iteration.
- Designed and developed the platform across web and mobile, building campaign management, promoter operations, scheduling, football tracking, OCR with Next.js, Node.js, and React Native.

Weybridge Ventures

Full Stack Developer, Jan 2023 – Jan 2026, UAE (Remote)

- Led the end-to-end development of AutoLEAD, a **multi-tenant automotive ecosystem**, from product planning and system design through implementation, deployment, and ongoing development.
- Designed and built AutoSHOWROOM, AutoMALL, and AutoFINANCE as integrated multi-tenant platforms supporting vehicle inventory, lead generation, dealer operations, and financing workflows across multiple markets.
- Designed and developed a unified internal CMS/CRM to manage and operate the multi-tenant ecosystem, centralizing business workflows and reducing operational complexity.
- Owned the engineering lifecycle across Next.js, Node.js, MongoDB, Vercel, and AWS, including architecture, infrastructure, deployment, and production operations.

Paramount Students

Full Stack Developer (Intern), Aug 2022 – Dec 2022, Türkiye (Remote)

- Contributed to the development and maintenance of web applications, implementing frontend features, backend APIs, and integrations while collaborating with the team to deliver product requirements.

Peeeko

Web Developer, March 2021 – July 2022, Pakistan

- Developed and maintained web applications and client-facing features, working across frontend and backend components to deliver functionality, fix issues, and support ongoing product development.

Skills

- **Languages & Frameworks:** TypeScript, JavaScript, React, Next.js, React Native, Node.js
- **Backend & Data:** PostgreSQL, MongoDB, REST API, GraphQL, Auth
- **Infrastructure & DevOps:** AWS, Docker, CI/CD automation, Vercel
- **AI Systems:** LLM integrations, RAG pipelines, vector search, workflow engineering
- **Testing & QA:** Jest, Playwright

Writing

- Writes about software engineering, product development, and practical approaches to building and shipping software on azharzaman.com.
- Translated the [GOV.UK Service Standards](#) into Arabic and Urdu, making the guidance accessible to a broader developer and product community.
